TETRA Accessories

Serving the needs of commercial, government and public safety agencies, Motorola TETRA solutions deliver comprehensive, high quality and reliable integrated information, communications products and services.

At Motorola we recognise professional radio users operate under diverse operational requirements and working conditions within a highly demanding environment. To address these requirements Motorola offers a wide selection of robust and reliable accessories. This extensive portfolio of accessories allows professional users to further customize their TETRA radios and satisfy their individual communications needs.

TETRA Portable Accessories

MTH800

MTP850

Genuine Motorola accessories enhance functionality and add both comfort and value to your TETRA radio. They are engineered to the same exacting standards as our radios to ensure maximum performance of your complete radio solution.

For portable radio users Motorola delivers a wide range of solutions covering carrying, power and charging, as well as audio accessory solutions – for any situation.

Energy & Charging Solutions

Critical communications solutions require reliable and efficient power sources and Motorola delivers this with a range of batteries and charging solutions. Our range includes desktop, multiway and in-vehicle charging solutions, coupled with the latest in - rechargeable cell technology.

Audio Solutions

Motorola TETRA radios give users access to a diverse range of voice services – group, telephony and individual calling. Motorola's range of audio accessories enable users to utilise these services efficiently, with tailored solutions for public safety and covert users, industrial and commercial users.

Carrying solutions

Motorola TETRA radios offer users many new features over traditional voice two-way radio – including text messaging, sophisticated users interfaces and access to data through features such as WAP browsers. These new capabilities require carrying solutions that allow easy access to these services, such as our innovative chest-worn carry system.

Capacity (mAh): MilliAmp Hours - standard way of measuring the energy that a battery can store

Intelligent: Is this an Impres smart™ battery?

Energy Density (Wh/L): Watt hours per litre (volume) - The relationship between the size and energy contained in the battery. The higher the number, the more energy for the battery size

Number of Charge Cycles: Typical number of times in it's lifetime that the battery can be charged

Memory Effect: Poor maintenance of some battery chemistry types can reduce their energy capacity

Requires Maintenance: Battery life and performance can be increased for some battery chemistries by using a battery maintenance system.

TETRA Mobile Accessories

MTM800

MTM800 Enhanced

CM5000 Gateway

Genuine Motorola accessories enhance functionality and add both comfort and value to your TETRA radio. They are engineered to the same exacting standards as our radios to ensure maximum performance of your complete radio solution.

When choosing a mobile radio solution, users need to address installation and operational requirements. Motorola's range of TETRA mobiles are supported with a comprehensive set of accessories enabling flexible in-vehicle installation or desktop use, together with audio and data solutions for the most demanding requirements.

Audio Solutions

Motorola TETRA radios give users access to a diverse range of voice services – group, telephony and individual calling. Motorola's range of audio accessories enables users to utilise these services efficiently, with tailored solutions for public safety and covert users, industrial and commercial users.

Installation Solutions

Motorola's TETRA Mobile range allows installation either as traditional dash mount radios, remote head installation or many other configurations – supported with an extensive range of mounting brackets, wiring harnesses and audio interfaces.

TETRA PDA Accessories

MTC100

Genuine Motorola accessories enhance functionality and add both comfort and value to your TETRA PDA. They are engineered to the same exacting standards as our radios to ensure maximum performance of your complete communication solution.

Data Connectivity & Charging Solutions

Critical communications solutions require reliable and efficient power sources and Motorola delivers this with a range of charging solutions. Choose from simple wall chargers or complete desktop solutions allowing you to charge your battery while connected to your PC for data synchronisation.

We also offer a range of cables for data connectivity including configuration of the TETRA radio modem.

Carrying solutions & Accessories

The MTC100 TETRA PDA gives users the potential to access critical operational data and submit information from the field – all using the power of TETRA data services. This robust platform is complemented by carrying solutions and devices to ensure your PDA is protected and accessible when you need it.
